

Health, Safety, Environmental and Quality Policy

WA TreeWorks specialises in the delivery of vegetation management services for domestic, commercial and government customers.

As such our integrated management system has been developed and implemented to ensure the safety of our staff and visitors, so that as a team we conduct our activities in an environmentally responsible manner and that we satisfy and where possible exceed our customers' expectations.

Our ongoing mission is to identify client objectives, seek out and create innovative and viable solutions that set the standard for safety and efficiency within our industry and seek out opportunities where WA Tree Works can make a positive contribution within the community.

In order to achieve this purpose we consult with staff members and set measurable objectives and targets that are regularly reviewed as part of our management review process.

The purpose of these objectives and targets is to ensure continual improvement:

- Intended to eliminate workplace injury and illness
- Demonstrating management commitment to training in the workplace
- To reduce our environmental impact and prevent pollution
- In the effectiveness of our integrated management system and its compliance to AS/NZS 4801:2001, AS/NZS ISO 9001:2008 & AS/NZS ISO 14001:2004
- Aimed at providing a workplace environment that supports and encourages all staff members to identify and achieve their professional goals.

We also acknowledge and comply with all applicable statutory and regulatory requirements.

David Barker

Managing Director
